To: Recruitment Team **Company:** Hyundai Nishat Motor **Subject:** Application for Summer Internship Program 2026

Dear Hyundai Nishat Recruitment Team,

I am writing to express my strong interest in the Summer Internship Program 2026. As a final-year Software Engineering student currently in my 7th semester, I am a dedicated automotive enthusiast eager to bring data-driven innovation to your state-of-the-art facility. I am applying because I want to be part of the next generation of tech disruptors driving global automotive excellence in Pakistan.

Most applicants simply want to observe how a manufacturing plant works; my goal is to actively help optimize it. To demonstrate my capability to add immediate value, I recently developed the **Hyundai Assembly Line QA & OPEX Analytics Engine**. This live Python-based dashboard simulates factory floor operations for models like the Tucson and Santa Fe, tracking First Time Through (FTT) yield, categorizing manufacturing defects, and calculating real-time rework costs to guide floor managers in their decision-making.

Furthermore, I understand that building cars is only half the equation—the other half is moving parts and vehicles efficiently. I previously engineered a **Macro-Logistics & Fleet Routing Optimizer** for Engro Eximp, a spatial mapping tool designed to calculate cost-effective travel routes and reduce operational expenditures (OPEX) for large-scale freight and supply chains.

By combining my technical stack (Python, Pandas, Streamlit) with my active tracking of the local automotive sector and capital markets, I am fully equipped to hit the ground running within your MIS, IT, or manufacturing operations teams.

I have attached my CV and transcript, which include live links to my enterprise prototypes. Thank you for your time and consideration. I look forward to the possibility of contributing to the Nishat Group.

Sincerely,

Lokesh Kumar BS Software Engineering, Sindh Agriculture University

SUBJECT: LETTER OF INTERNSHIP

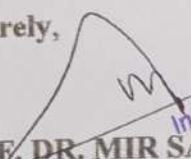

Dear Sir,

I am writing to enthusiastically recommend Lokesh Kumar, a third-year BS Software Engineering student at Sindh Agriculture University Tando Jam, for your internship program. I have had the pleasure of knowing Lokesh through their coursework and active involvement within our Institute of Information Technology Centre (ITC).

Lokesh has consistently demonstrated a strong grasp of software engineering principles and a highly dedicated approach to their studies. They possess a solid foundation in programming, problem-solving, and data structures, and are clearly eager to apply their knowledge in a practical setting.

I am confident that Lokesh would be a valuable asset to your team and a strong contributor to your internship program.

Sincerely,

PROF. DR. MIR SAJJAD HUSSAIN TALPUR
DIRECTOR,
Institute of Information Technology Centre (ITC)
